February 19, 2021

Dear Friends & Family of Calvary Place:

I trust that this letter finds you all healthy and safe. As you may be aware, our residents are receiving their second dose of the Pfizer vaccine today. We are again fortunate to have our three Calvary Place nurses assist with the immunization today. All protocols and monitoring for any side effects has been implemented and is in place.

Our new website is up and running and on a go forward basis, the family update letters that I send out will also be placed on our website. The CEO letters can be accessed via our website ([www.calvaryplacepch.com](http://www.calvaryplacepch.com)) for those who do not receive the emails. Please pass this information on to your family members. We are also in the process of putting together a Virtual Tour of Calvary Place onto the website, and are hoping that this will soon be in operation.

Our Visitation Rooms are now complete and ready for visits! Thank you all for your patience, especially to those who we've had to cancel appointments on. This has been a trying time for all of us but we think the end result is positive. All bookings are scheduled through our website; just a reminder that all bookings are made a minimum 72 hours in advance, so keep that in mind when planning a visit. There are more details for you to read on the booking page, so please make yourself familiar with that content so you know what to expect when visiting.

Calvary Place continues to remain COVID free at this point in time, and we are very thankful for this. Even though the community levels are going down, we need to ensure that we do not let our guard down. Utilization of masks, eye protection and cleaning of high touch surfaces continues.

I have been asked on numerous occasions as to when our hairdresser will be allowed to come back to work. I am very pleased to inform you that our hairdresser will be back next week Wednesday, to resume hairdresser services at Calvary Place. I spoke with her briefly on February 18, 2021, and she is very excited to come back. There are a number of protocols and guidelines that need to be in place including limiting the number of residents in the room at one time, disinfecting surfaces between residents, as well as a requirement for the hairdresser to wear a medical grade mask and eye protection.

Sincerely

Helmut Plett, RPN/CEO/DOC
